

“ Directly scanning in every application on your Server over RDP...  
... with **TSX Scan** ”

## Product Overview

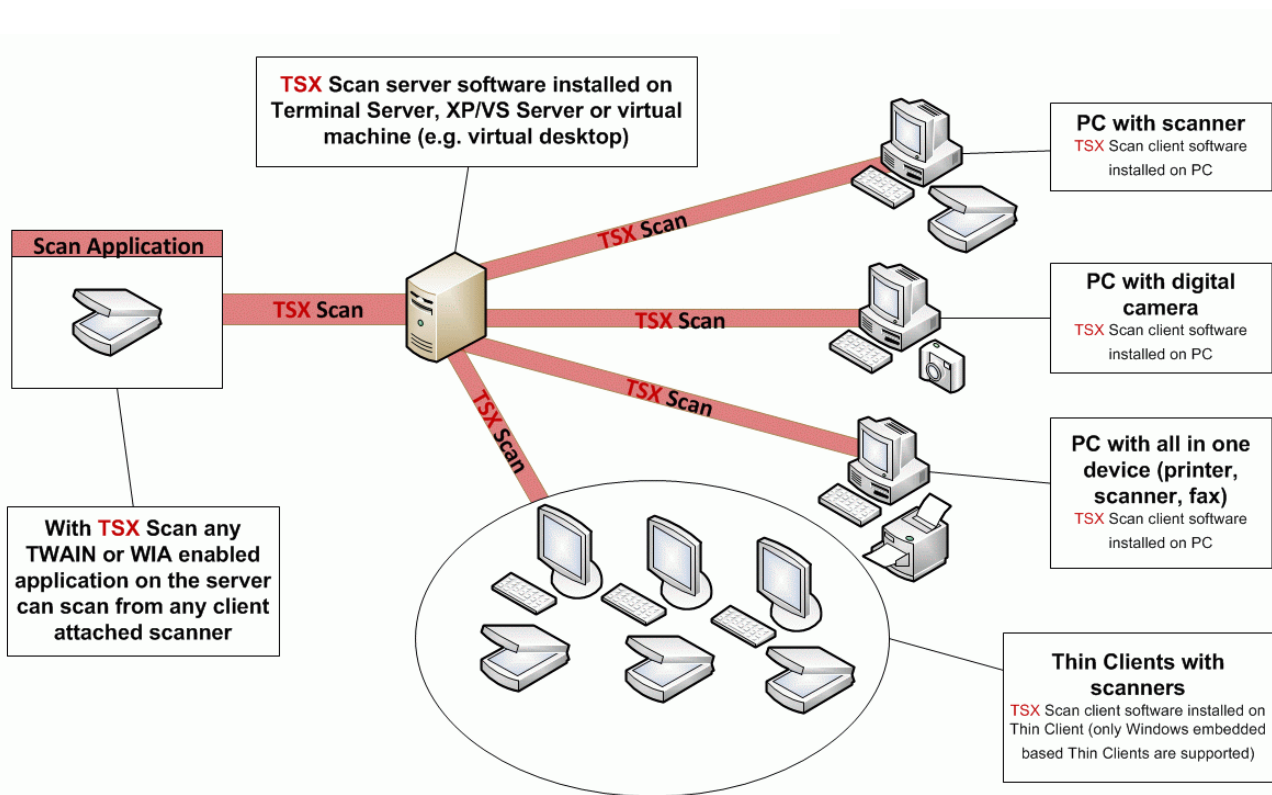

With TSX Scan any TWAIN or WIA enabled application on the server can directly scan from any client attached scanner over the Remote Desktop Protocol (RDP).

By compressing the scan job TSX Scan can even reduce the caused network traffic up to 90%!

TSX Scan is perfectly designed for multi-user environment. The user will never see the redirected scanners from other users!

TSX Scan is fully compatible with Microsoft's Terminal Services / Remote Desktop Services and works perfectly with Thinstuff's alternative Terminal Server solution called XP/VS Server.

“ Enjoy the **high qualified & fast technical support** ”

## Key Features

---

- With TSX Scan the installation of scanner drivers is not required on the server side. A “driver-less” solution for scanner redirection over Remote Desktop connections.
- **TSX Scan** uses highly efficient compression for transmitting scan jobs over the network.
- Supports the full TWAIN 2.0 standard
- Multi-user support: multiple users scan concurrently! Perfect solution for multi-user environments like medical institutions and financial companies!
- Supports the standard Windows Remote Desktop Connection client(RDP protocol)
- Works with Thinstuff XP/VS Server and Microsoft Terminal Services/Remote Desktop Services.
- Can be used in any virtual environment: XEN Desktop, VMWARE View, Microsoft Hyper-V Server, Microsoft Virtual PC, Windows 7 XP Mode, Virtual Box etc.
- **TSX Scan** supports any client attached TWAIN or WIA enabled devices like e.g. scanners, webcams, digital cameras etc.
- **TSX Scan** offers 2 different tunneling methods for the scan data. You can choose between virtual channel or TCP/IP

## System requirements

---

### Hardware requirements:

CPU: Min. Pentium IV 1Ghz or better  
RAM: Min. 512MB

*Recommended values for each additional RDP user:*

CPU: additional 100Mhz  
RAM: additional 128MB

### Software requirements:

Windows XP, Vista, Windows 7, Server 2003, 2003 R2, 2008, 2008 R2 and all SBS-editions

### Trial Version

Free fully featured 14-day version

“ Cost savings in your IT infrastructure ”

## Other Thinstuff Products

---

- **XP/VS Terminal Server:**

XP/VS Server is a cost effective multi-user Remote Desktop access solution for Windows using the standard Microsoft Remote Desktop Protocol (RDP).

Installing XP/VS Server allows an unlimited number of users remote-access to all their Windows desktops and applications simultaneously.

Because compatible Remote Desktop Connection client software is already preinstalled on most devices and operating systems, seamless integration into existing networks without any hardware or software changes is assured. XP/VS Server is suitable for small and medium enterprises and offers premium support services.

- **XP/VS Server with RemoteFX support:**

XP/VS Server also supports the RemoteFX codec which was introduced with Windows 7 and Server 2008 R2 Service Pack 1. The RemoteFX codec allows a rich user experience of any Multimedia content over Remote Desktop connections by using advanced encoding and compression technologies on the server side. Hardware RemoteFX decoding on the client side allows highly efficient and low cost Thin Clients starting from 150,00 €.

**TSX Remote Desktop Connection (TSX RDC) - for Windows and Mac OS X with TSX Connect & TS RemoteApp :**

Start your Remote-Desktop-Connection from Windows and Mac OS X with our new RDP-client TSX RDC (including TSX Connect) to your Remote-Desktop server. TSX RDC supports TS RemoteApp and also allows easy configuration of RemoteApp connections for publishing single applications instead of a complete Windows desktop. TSX RDC for Windows additionally supports TSX RemoteApp.

- **TSX Remote Desktop Connection (TSX RDC) for Android and iOS with TSX Connect:**

Start your Remote-Desktop-Connection from your mobile phones and tablet PCs running Android or iOS (like iPhone and iPad) with our new RDP-client TSX RDC (including TSX Connect) to your Remote Desktop Server.

- **iRdesktop:** Free Remote Desktop connection client for Apple iOS (iPhone and iPad) available for download in the iTunes App Store.
