# XP/VS Terminal Server

**Thin**stuff

" Turn any Windows system into a full-blown Terminal Server ...

... with **XP/VS Server** "
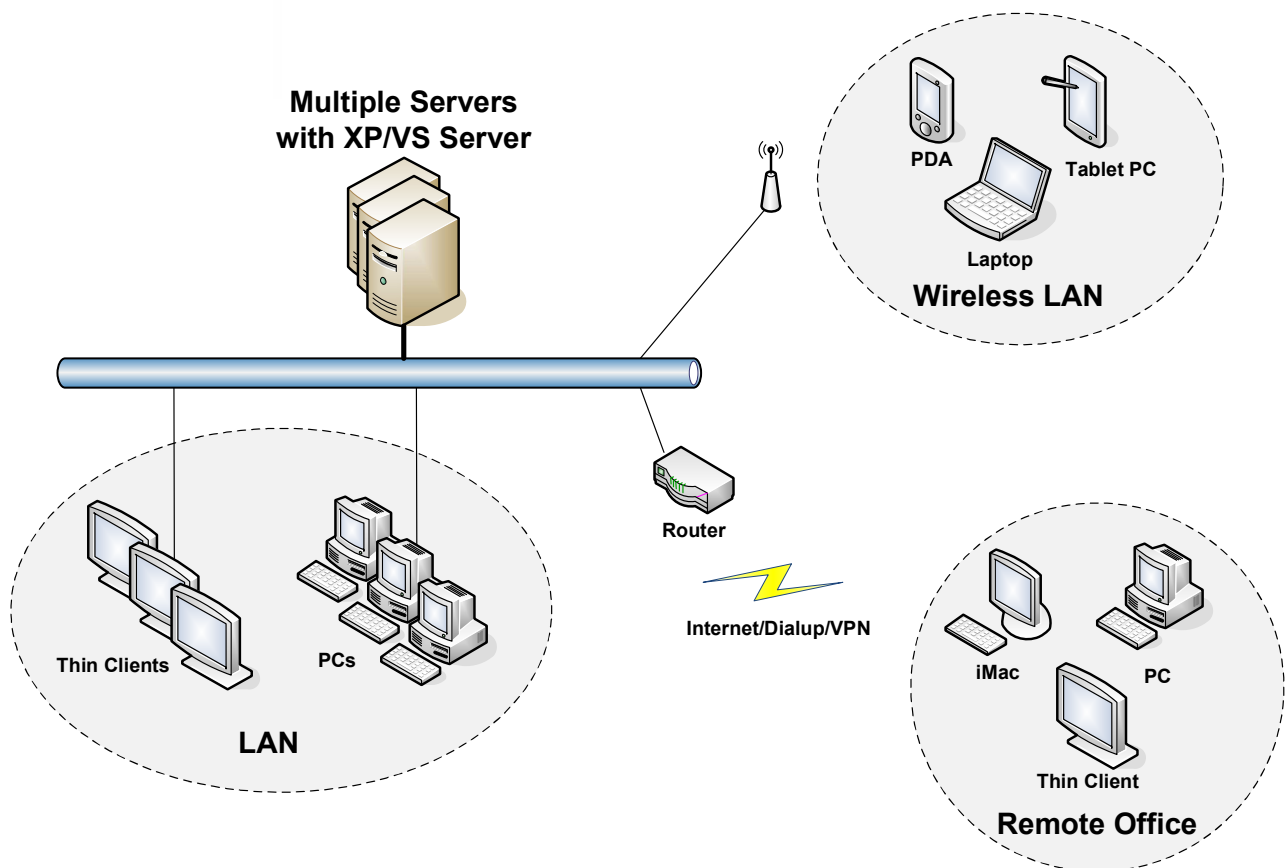

## Product Overview

XP/VS Server is a cost effective multi-user Remote Desktop access solution for Windows using the standard Microsoft Remote Desktop Protocol (RDP) and offers full compatibility with Microsoft Terminal Services / Remote Desktop Services.

Installing XP/VS Server allows an unlimited number of users remote-access to all their Windows desktops and applications simultaneously.

Because compatible Remote Desktop Connection client software is already preinstalled on most devices and operating systems, seamless integration into existing networks without any hardware or software changes is assured.

XP/VS Server is suitable for small and medium enterprises and offers premium support services.

## Key Features

- XP/VS Server offers all major features of Microsoft Terminal Services / Remote Desktop Services

- Unlike Microsoft Terminal Services / Remote Desktop Services XP/VS Server also works on Windows XP, Vista, Windows 7, Small Business Server, Foundation Server and even the Home versions of XP, Vista and Windows 7.

- **TSX USB:** usage of any USB device over the network (USB 1.1. and 2.0) within the RDP session.

- **TSX RemoteApp** TSX RemoteApp allows publishing of single applications instead of a complete Windows desktop over Remote Desktop connections. Applications published with TSX RemoteApp appear on the client desktop as if they were local with their own start menu entry, taskbar icon and resizable window.

- **TSX Session Broker** (Load Balancing): In multiple Terminal Server environments, incoming RDP sessions are automatically distributed among the Terminal Servers of a load balancing cluster .

- Support for Windows 7, Server 2008 R2 Service Pack 1 and Microsoft Foundation Server 2011

- **XP/VS Server with RemoteFX support:** XP/VS Server also supports the RemoteFX codec which was introduced with Windows 7 and Server 2008 R2 Service Pack 1. The RemoteFX codec allows a rich user experience of any Multimedia content over Remote Desktop connections by using advanced encoding and compression technologies on the server side. Hardware RemoteFX decoding on the client side allows highly efficient and low cost Thin Clients starting from 150,00 €.

- **XPVS Server with TSX Connect:** Simple and secure RDP connections through any NAT and firewall devices. Just use your Google account to connect! This helpful feature is part of XP/VS Server and our new Remote-Desktop-Client "TSX Remote Desktop Connection" (TSX RDC), which is available for Windows, Android, Mac OS X and iOS.

## System requirements

**Hardware requirements:**

CPU: Min. Pentium IV 1Ghz or better
RAM: Min. 512MB

*Recommended values for each additional RDP user:*

CPU: additional 100Mhz
RAM: additional 128MB

**Software requirements:**

Windows XP, Vista,Windows 7, Server 2003, 2003 R2, 2008, 2008 R2 and all SBS-editions

**Trial Version**
Free fully featured 14-day version

"*Cost savings in your IT infrastructure*"

## Features (currently under developement)

- **TSX** **Application Control:**
  Access to specific applications can be restricted to designated groups or users .

- **TSX** **Gateway (RDP VPN Solution):**
  Encrypted transmission of the RDP protocol through SSL secured HTTPS connections on port 443 over the internet.

- **TSX** **Web Access (Web Portal):**
  Access to published applications through a web portal .

## Other Thinstuff Products

- **TSX** **Scan (TWAIN/WIA over RDP):**
  With TSX Scan any TWAIN or WIA enabled application on the server can directly scan from any client attached scanner over the Remote Desktop Protocol (RDP).

- **TSX** **Remote Desktop Connection (TSX RDC) - for Windows  and Mac OS X with TSX Connect & TS RemoteApp :**
  Start your Remote-Desktop-Connection from Windows and Mac OS X with our new RDP-client TSX RDC (including TSX Connect) to your Remote-Desktop server. TSX RDC supports TS RemoteApp and also allows easy configuration of RemoteApp connections for publishing single applications instead of a complete Windows desktop. TSX RDC for Windows additionally supports TSX RemoteApp.

- **TSX** **Remote Desktop Connection (TSX RDC) for Android and iOS with  TSX Connect:**
  Start your Remote-Desktop-Connection from your mobile phones and tablet PCs running Android or iOS (like iPhone and iPad) with our new RDP-client TSX RDC (including TSX Connect) to your Remote Desktop Server.

- **iRdesktop:** Free Remote Desktop connection client for Apple iOS (iPhone and iPad) available for download in the iTunes App Store.
